

Title: Senior Quality Assurance Engineer

Location: Seattle, WA

Company: QualityTech Innovations LLC

About the Company: QualityTech Innovations LLC is a leading innovator in quality assurance solutions, providing cutting-edge testing services to clients worldwide.

Job Description:

We are looking for an experienced and proactive Senior Quality Assurance Engineer to lead our quality testing efforts and drive excellence in our software products. As a Senior Quality Assurance Engineer, you will be responsible for designing, implementing, and executing comprehensive test strategies to ensure the reliability and performance of our applications.

Responsibilities:

Lead the development and execution of test plans, test cases, and test scripts for complex software systems.

Design and implement automated testing frameworks and tools to streamline testing processes.

Conduct performance testing, load testing, and stress testing to assess system scalability and reliability.

Mentor and coach junior members of the quality assurance team.

Collaborate with development teams to identify and resolve defects and performance issues. Stay abreast of industry standards, tools, and best practices in quality assurance and testing.

Requirements:

Bachelor's or Master's degree in Computer Science, Information Technology, or related field.

Proven experience in designing and implementing test strategies for software applications.

Proficiency in test automation tools and scripting languages (e.g., Selenium, Python, Java).

Strong understanding of software development methodologies (e.g., Agile, Scrum).

Excellent leadership, communication, and problem-solving skills.

Relevant certifications such as ISTQB or CSTE are preferred.
