

Title: Senior Cyber Security Engineer

Location: Washington, D.C.

Company: SecureNet Solutions Inc.

About the Company: SecureNet Solutions Inc. is a trusted provider of comprehensive cybersecurity solutions for government agencies and enterprises worldwide.

Job Description:

We are looking for an experienced and proactive Senior Cyber Security Engineer to lead our cybersecurity initiatives and drive innovation in our security architecture. As a Senior Cyber Security Engineer, you will be responsible for designing, implementing, and maintaining robust security solutions to protect our clients' critical assets.

Responsibilities:

Lead the design and implementation of security controls and solutions to protect against cyber threats.

Conduct risk assessments and security audits to identify vulnerabilities and weaknesses.

Develop and maintain security policies, procedures, and standards in compliance with industry regulations.

Provide technical guidance and mentorship to junior members of the cybersecurity team.

Collaborate with stakeholders to assess security requirements and recommend appropriate solutions.

Stay abreast of emerging cybersecurity technologies and industry trends.

Requirements:

Bachelor's or Master's degree in Cybersecurity, Computer Science, or related field.
Proven experience in designing and implementing cybersecurity solutions in complex environments.

Deep understanding of cybersecurity principles, protocols, and technologies.

Proficiency in security assessment tools and methodologies.

Strong leadership, communication, and problem-solving skills.

Relevant certifications such as CISSP, CISM, or CEH are preferred.
