

Title: Senior Frontend Engineer

Location: Seattle, WA

Company: CodeCraft Innovations Inc.

About the Company: CodeCraft Innovations Inc. is a software development company dedicated to delivering cutting-edge solutions for businesses worldwide.

Job Description:

We are looking for an experienced and talented Senior Frontend Engineer to lead our frontend development efforts and drive innovation in our web applications. As a Senior Frontend Engineer, you will be responsible for architecting, designing, and implementing frontend solutions to meet our clients' needs.

Responsibilities:

- Lead the design and development of frontend architectures and components.
- Mentor and coach junior members of the frontend development team.
- Collaborate with backend engineers and designers to integrate frontend components with backend services.
- Implement best practices for frontend performance optimization and code quality.
- Stay informed about emerging frontend technologies and trends.
- Provide technical guidance and support to project teams.

Requirements:

- Bachelor's or Master's degree in Computer Science, Web Development, or related field.
- Proven experience in frontend development with a focus on building scalable and maintainable web applications.
- Expertise in HTML, CSS, JavaScript, and frontend frameworks/libraries.
- Strong understanding of web accessibility and user experience principles.
- Excellent leadership, communication, and collaboration skills.
- Experience with version control systems (e.g., Git) and CI/CD pipelines.
